

1. In retrospect, what could you have done better to reduce the time you spent solving this homework?
  - a. I could have started the homework earlier and reviewed the lecture recording instead of just reviewing the slides to reduce the time I spent solving this homework.
2. What could we, the teaching staff, have done better to improve your learning experience in this homework?
  - a. I feel like the homework should align more closely with the lecture, so that when we finish a topic, we then get a homework on the topic, instead of having to wait for the lecture to cover everything to start the homework.
3. What do you know now that you did not know before beginning the homework?
  - a. I know how to differentiate what is a good and strong condition vs a weak one. I also learned how to check if a Hoare Triple is valid, and how to use forward and backward reasoning.
