

1. In retrospect, what could you have done better to reduce the time you spent solving this homework?
 - a. I could have started the homework earlier and also went to office hours earlier.
2. What could we, the teaching staff, have done better to improve your learning experience in this homework?
 - a. Office hours could use a lot more staff, there was only one TA and mentor at the 4-8 office hours, and I never got helped, even after waiting 2 and a half hours.
3. What do you know now that you did not know before beginning the homework?
 - a. I learned about coding in dafny, and how to write a loop invariant and prove it. I learned that you can write a dafny program without the pre-condition as well, but it just might be harder.
