

1. In retrospect, what could you have done better to reduce the time you spent solving this homework?
  - a. I could have started the homework earlier and also went to office hours earlier.
2. What could we, the teaching staff, have done better to improve your learning experience in this homework?
  - a. Nothing, it was really nice that the hw was extended twice to accommodate for us.
3. What do you know now that you did not know before beginning the homework?
  - a. I learned about polynomial functions, and learned a lot on how to write code in java. Before, it was just basic knowledge transferred from C++, but now I know a lot more about java. I also learned a lot about specifications and ADTS, and how it's important to write code that is correct, and has no bugs.
